B. **Truck Unloading:** Truck unloading shall mean the service of removing cargo from the body of the truck to a place of rest designated by the Terminal Operator, and shall include sorting by port.

The unloading of cargo from the truck shall be under the supervision of the driver of the truck.

C. **Partial Loading or Unloading (Tailgate):** Partial loading or unloading, commonly called "tailgate loading or unloading," shall be defined as that loading or unloading which enables the pier operator, through the use of a forklift truck and operator only to place, or remove, cargo onto or from the tailgate of the truck. Tailgate loading shall also be defined as such when, through the use of the pier operator's platform or by removal of stakes or standards of flat bed equipment, the forklift operator is able to place the cargo either at a point of rest on the truck or in a position for further handling by personnel of the motor carrier.

All other loading and/or unloading that requires more equipment and/or personnel than one forklift truck and operator per package or pallet shall be considered full loading or unloading.

The choice of partial or full loading and/or unloading shall be left to the discretion of the motor carrier, shipper or consignee provided the service requested comes within the provisions of this definition. (These provisions shall not be construed as compelling the Terminal Operator to provide pallets.)

Note: For full truck loading and unloading services the Terminal Operator must be notified by 3:00 P.M. the day before a full work order is requested; otherwise, the necessary labor may not be available for these services.

Note: A cancellation charge of \$250.00 per truck for all trucks that make an appointment and do not show up for that appointment will be assessed.

The cargo must be loaded in such a manner as to cover the loading surface of the pallet, leveled at the top and squared on all four sides so that the unit forms a smooth block. The pallet must be an integral part of the cargo and must remain with the cargo when it is moved either as an export or an import shipment. Any palletizing performed on the pier does not qualify for the pre-palletized rate. In order to qualify for the pre-palletized rate the minimum weight or measurement of the pallet, and cargo shall be either 1,000 pounds or 64 cubic feet, and the maximum weight shall be 10,000 pounds.

Note: Bales or bundles, skidded machinery, iron, steel and other unfinished metals and glassware are not included in this definition. Cargo in excess of 10,000 pounds shall be billed at the heavy lift charges.
